

# Video 257: More on Gnostic Cosmology —the Kenoma vs. Orion

by Wes Penre, May 22, 2021

*The video to this transcript can be found on our Video channel: <https://wespenrevideos.com>*

---

**A**t least since the Matrix series came out in the theatres, people in the alternative fields have called our 3-D reality “the Matrix.” We see it as either a simulated reality, and/or a narrow frequency band, within which humankind is limited. This has been the norm of thinking in the alternative field since the beginning of this millennium.

In the Wes Penre Papers (WPP), I discussed the 4% Universe, which would correspond with this limited frequency band, and the 96% Universe, which is the Universe humans in our 3-D bodies cannot perceive. Science calls the invisible Universe *dark matter* and *dark energy*, and they don’t know what it is and why we cannot see it. In the WPP, I wrote that the invisible Universe is Orion, or the Orion Empire (see [wespenre.com](http://wespenre.com) for more info).

Then, I started looking into the Gnostic texts and discussed those on my blog<sup>1</sup>. As far as I am concerned, the Gnostic texts (GT) are a direct extension of the WPP, or I would say the WPP are to a degree the GT but told from another perspective.

---

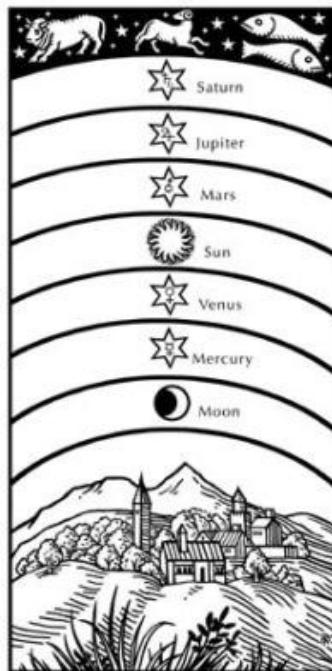

<sup>1</sup> <https://wespenrevideos.com/>

In the GT, there are four major “realms” being mentioned. They are, the Pleroma (the Spiritual Realm), the 9<sup>th</sup> and 8<sup>th</sup> Heavens (Sophia’s/the Orion Queen’s Realm in the physical Universe), the 7<sup>th</sup> to 1<sup>st</sup> Heavens, i.e., the Kenoma, which we usually call the Matrix, and finally the 5 Heavens/dimensions of the Underworld or the Abyss. This cosmological setup is not only conveyed in the GT; it is the setup conveyed in almost all ancient cultures; if not exactly the same, at least they are very similar to each other. In this video, we will concentrate on the GT cosmology and cosmogony.

In the GT, we are told there is a veil between Sophia’s 8<sup>th</sup> and 9<sup>th</sup> Heavens and the lower Heavens, where we humans and the Archons reside, among other beings of different kinds. In the WPP, I called the 8<sup>th</sup> and 9<sup>th</sup> Heavens Orion, so the 8<sup>th</sup> and 9<sup>th</sup> Heavens and Orion are synonymous. The rest of the Universe is the Kenoma/Matrix/Patrix.

So far, many people who have read the WPP and some of the GT probably agree. But what *are* the 7 Heavens? How far do they stretch and where are they located in the physical universe (because mind you, even Orion is a part of the physical universe but is largely lit up by Sophia’s Spirit). Some of Sophia’s Spirit is also present in the Kenoma, but it has been fading through the ages. Humans, however, as the only beings in the physical universe, possess Sophia’s Spirit, in addition to having a soul, which is our personality.

On the screen right now (or below, if you are reading the transcript) is a picture I have been using a lot. It is a depiction from ancient texts of the 7 Heavens, aka the Kenoma.

Look at this diagram very carefully. Obviously, you see the Earth at the bottom, and then you see certain celestial bodies above with Saturn on top. Above that, you have the star

constellations. You might say this is a diagram of the solar system (more or less), and the star constellations are beyond the solar system. This is of course NASA's public version of the Universe. But let us look at it from another angle.

According to the Gnostic texts (GT)<sup>2</sup>, each of these celestial bodies are possessed and controlled by an Archon, and each celestial body is a Heaven. How many celestial bodies can you count to in this diagram? Seven, right? These are the 7 Heavens. This means that anything and everything that is *outside* our solar system is Orion. The solar system, including Earth, which is the Underworld, consisting of 5 additional Heavens/dimensions, is the Kenoma.

A thought might come to mind: if the solar system is the Matrix/Kenoma, the realm of the Archons seems very tiny. Yes, it is, compared to Orion, but we also need to remember that we humans have a very limited frequency band within which we view things. The celestial bodies are occupied by the Archons, but these heavenly bodies exist in many different dimensions and densities; we can only see the barren 3-D perspective. Also, the spheres between the planets are part of the sphere of that particular Heaven, respectively. For instance, the Heaven of Mars (the 5<sup>th</sup> Heaven), consists of the planet itself and the "space" between Mars and Jupiter and all the additional dimensions within that sphere/space/cosmic water.

Now, look at the diagram again! Does it seem like these planets, including Earth, are revolving around the sun? No! Here is my theory: the planets, including Earth, don't revolve around the sun at all, which we also can see in gnostic and other ancient diagrams; they revolve around Earth and move within our atmosphere!

Now wait! What do I mean by that? I mean that everything we have been taught about the solar system and the Universe is wrong! My interpretation of the GT and all the other major ancient texts is that all these heavenly bodies exist *within the Earth's atmosphere!*

Before you shake your head in disbelief, take an observer's viewpoint, without having any preconceptions, and look at this. In school we have clearly learned that outer space begins where the atmosphere ends. And in near space we have the planets and the sun. What if that is false, too? What if the atmosphere stretches much farther out, but we humans are only allowed access to so much of it? Remember that all these planets; including the sun; are Archontic domains. Would the Archons really allow us humans to enter their domains as we wish, or would they only allow it on occasion, when it suits them?

The moon is currently an Archontic domain, as well. So, what about the Apollo moon landings? Were they real or fake? Well, there is much evidence that the footage was created in a studio by Stanley Kubrick and his team, and that the Apollo astronauts never

---

went to the moon. This seems very plausible in the scheme of things, doesn't it? However, does that mean that no humans have ever been to the moon? Not necessarily. It depends on whether we have been allowed access. If, or when we were, did we go in the physical or in an astral body? What about so-called "teleportation?" Is that real? These are questions we can ask ourselves. Also, one of the best remote viewers in modern time, the late Ingo Swann, remote viewed the moon and saw human slave labor working inside the moon. He wrote about it in his book, *Penetration*. He was noticed by humans on the moon during his session, and in shock, he withdrew his soul-fire, afraid of being captured.

Let's ask ourselves, if this is really what Ingo Swann experienced, how could these humans see him when he was not in the physical? The obvious explanation is that they were not in a physical 3-D body, either. They could very well have been in a higher density body.

Moreover, look at the moon; particularly when there is a full moon. Does it seem like the moon is 239,000 miles away, somewhere in outer space, or does it look like it's within the atmosphere, being the closest celestial body to Earth, but very much closer than NASA is telling us? The latter is obvious to me. When we think of it in these terms, we start seeing things we were blind to before. We just uncritically accept NASA's lies that the moon is 239,000 miles away as a fact. However, when we objectively observe this heavenly body, it's almost ridiculous that we could be so naïve before.

In the WPP, I wrote about the Saturn stargate, and how it used to be Ninurta's/Sabaoth's domain (the 7<sup>th</sup> Heaven), but it was conquered by En.ki/Yaldabaoth and Marduk, and Ninurta fled through the stargate, which led directly to Orion. What does this mean? It means that outside Saturn is Orion as per the diagram I showed you. The Saturn stargate was then closed.

I also wrote in the WPP that En.ki/Yaldabaoth and the other Archons/the AIF no longer have access to the KHA, *except* to small portions of it. In the 5<sup>th</sup> Level of Learning I discussed which portions they are<sup>3</sup>. There are certain star systems and constellations in Orion that the Archons and their foot soldiers conquered in the far gone past, and they still have access to those systems. They can use their hollowed-out crafts (asteroids, etc.) to travel through stargates and star lanes to those locations outside the Kenoma, but that's also all they have access to in addition to our solar system, i.e., the Earth's atmosphere.

So, when I say there are wars in the KHA, i.e., in Orion, that's what it is. These wars are mostly, from what I understand, being played out in these former Orion domains, currently occupied by the Archontic forces.

In summary, the Kenoma is our solar system, which apparently exists within the Earth's atmosphere, being much larger than we are led to believe. I am certain this is known by

NASA, but they are not telling us this in public. The Nazi occult EL-ite definitely knew about it, and because many survivors of this EL-ite were employed by NASA after WW 2, NASA obviously knows about it. The current public cosmology, however, is more beneficial for the EL-ite and the Archons these days and in days to come.
